II. Industry and Occupational Projections

The employment projections are produced using the Projections Suite software provided by the Projections Managing Partnership.

A. Short Term Industry & Occupational Projections 2014-2016

Short term projections were completed and made available statewide through the Puerto Rico Bureau of Labor Statistics Webpage. Reports are now available in English and Spanish at:

<http://www.mercadolaboral.pr.gov>

B. Long Term Industry & Occupational Projections by WIOA Areas 2012-2022

Long term projections by WIOA Areas were completed, disseminated and available statewide through the Puerto Rico Bureau of Labor Statistics Webpage. They are disseminated through conferences targeted to: students of elementary and high school, Labor Development Program (PDL), advisors and planners, Department of Labor Regional offices, universities and employment fairs. Reports are now available in English and Spanish at:

<http://www.mercadolaboral.pr.gov>

III. Web Page and First Puerto Rico Labor Market Conference and Other Reports

A. Annual Economic Analysis Report 2014-2015 (Included in a separate document)

This report will also be available at: <http://www.mercadolaboral.pr.gov>

Dissemination of labor market information is one of the deliverables comprising the cooperative agreement between the Employment and Training Administration and the Puerto Rico Department of Labor and Human Resources (PRDOLHR). As a tool and also as another of the deliverables in the agreement, the PRDOLHR, developed its WEB page for the dissemination of labor market information and other relevant information pertaining to the characteristics and expectations on the Island.

In pursuing the achievement of these deliverables, on June 26, 2015, the PRHDOL celebrated its First Labor Market Conference in Puerto Rico. The conference, served two main purposes: the official presentation and announcement of the public availability of the web page, and the dissemination through the development of a series of conferences and afternoon panel, of an analysis (from different perspectives) of the labor market situation in Puerto Rico conducted by a series of experts in the area.

The conference organization allowed for general overview of the historical evolution, present conditions and development perspectives of the labor market from several aspects as the agenda below illustrates.

The conference began with a greeting from the PRDOLHR Secretary of Labor, the Honorable Vance Thomas with a brief description of the day's activities.

The presentation and description of the Labor Market Web Page was given by the Secretary of Planning, Research and Development. The special guest for the activity was, Mr. Jim Sibley Deputy Commissioner of the Bureau of Labor Statistics from the Boston Region. He presented the different surveys conducted by the States and Territories related to labor force activities and their corresponding perspectives.

The second half of the conference was structured by offering presentations of a panoramic view held by different experts on the subject, beginning with, Mr. Hiram Díaz Belardo, Director of the Office of Youth Affairs, followed by, José E. Acaron Rodriguez, the Caribbean Area Director of the AARP in Puerto Rico, and finally by a panel discussion on the Structural Transformation of Puerto Rico's Workforce conducted by Mario Marazzi Santiago, Puerto Rico's Director of the Statistics Institute of

with the participation of Mr. Julio Cesar Hernández, PHD., from Turabo University, Mr. Juan Lara, PHD., from Advantage Business Consulting and Ms. Viviane Fortuño, President of Career Transitions, P.R.

An audience of approximately 150 persons representing most of the community sectors, including Case Managers from the Employment Service Division, Counselors from the Department of Education, Representatives from four of the most important colleges and universities on the Island, guests from professional and non-profit organizations, government officials and independent consultants.

The LMI Web Page

In order to train certain State Bureau of Labor Statistics staff members on how to use this web page, a training conference was designed and divided into four (4) sections. The first was the presentation to the staff at the Bureau of Labor Statistics, specifically to those in charge of disseminating the various data-derived products. This first session was presented July 1st, 2015 from 9:00 to 10:00am. The other three (3) presentations were complete successes, all given on July 6th, 2015, by LMI Grant staff members. For now, we are coordinating other conferences to be given (by the LMI staff) at the PRDOL local area offices, with the main purpose of making the web page user friendly to all PRDOL staff members. In order to announce the use of the page, an email was sent to all mailing-list users with the web page's address as the main reference point.

Enclosure: Presentation, web page

INFORMATION ABOUT PUERTO RICO'S LABOR MARKET WEB PAGE (presentation)

Slide 3: **LABOR MARKET INFORMATION**

The Section was created with a grant contract between the Employment and Training Administration (ETA), and the Puerto Rico Department of Labor (PRDOL) in order to:

- Disseminate labor market information throughout Puerto Rico, and its municipalities.
- Assist users in the implementation of the user the compiled and analyzed information.
- Assist in decision processes known as “workforce intelligence”, based on current labor market demands.

Slide 4: *Labor Market Information (continued)*

- Is a requirement of the cooperative agreement between PRDOL and ETA.
- Its purpose is to disseminate labor market data and related information.
- It is a comprehensive labor market information system targeted toward research, planning and decision making
- It is a user-friendly web site for all users, such as:
 - o Jobseekers
 - o Employers
 - o Students
 - o Occupational Advisors / Guidance Counselors
 - o Planners, Economists and Statisticians
 - o Researchers

Slide 5: **State Bureau of Labor Statistics**

Section 309 of the Workforce Information and Opportunity Act (WIOA) requires all States to work in unison with the State Bureau of Labor Statistics in every jurisdiction, in order to provide users with needed information when facing occupational decisions.

IV. Customer Satisfaction Survey

The Labor Market Information (LMI) Division of the Puerto Rico Bureau of Labor Statistics (BLS) annually develops a Customer Satisfaction Survey (CSS). It consists of a questionnaire targeted toward users of state workforce statistics and the Bureau's publications, sponsored by the Puerto Rico Department of Labor (PRDOL). The survey measures the users' perception of the publications and BLS surveys.

The purpose of the CSS survey is to:

- Improve information services for our customers;
- Evaluate the quality of the information produced, enhancing as much as possible, the information requested by our clients;
- Comply with the required deliverables from our federal funding sources, and explore the system users' satisfaction level, regarding the information provided by us.

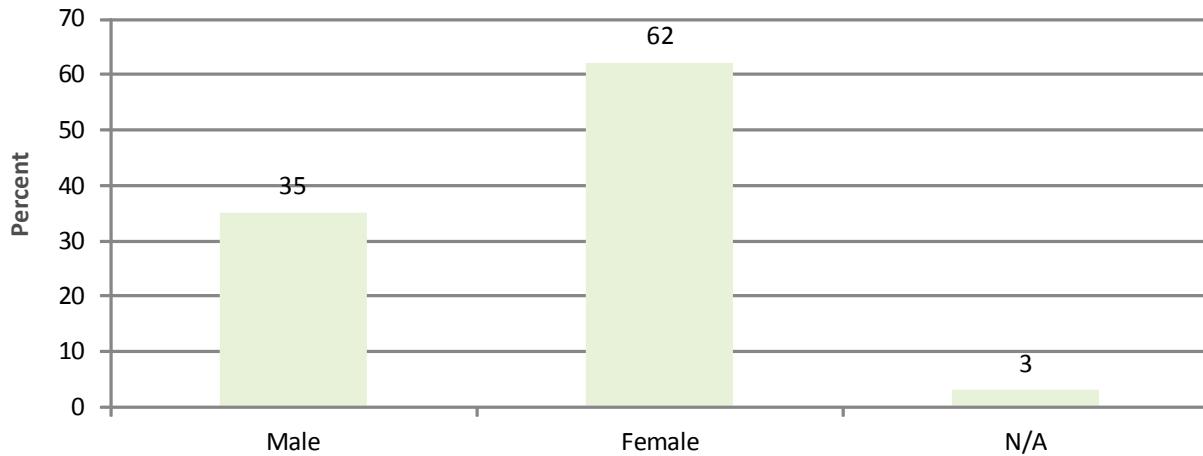

A total of 511 questionnaires were sent during a three-month period from May to July 2015. After follow-ups, 78 answered questionnaires were received with a response rate of 15.3 percent.

In this document we present the results of the survey, with added comments and recommendations from our customers.

Results

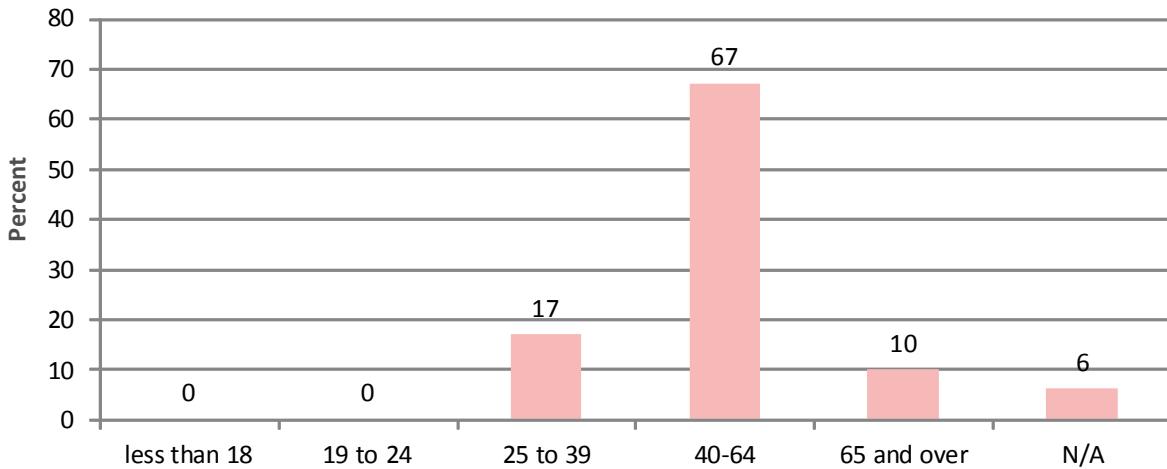

In terms of gender, females represent our main user of the system, with 62.0 percent of the answers, while males represented 35.0 percent of all who answered. Three percent did not reply to this question.

Gender of Respondents

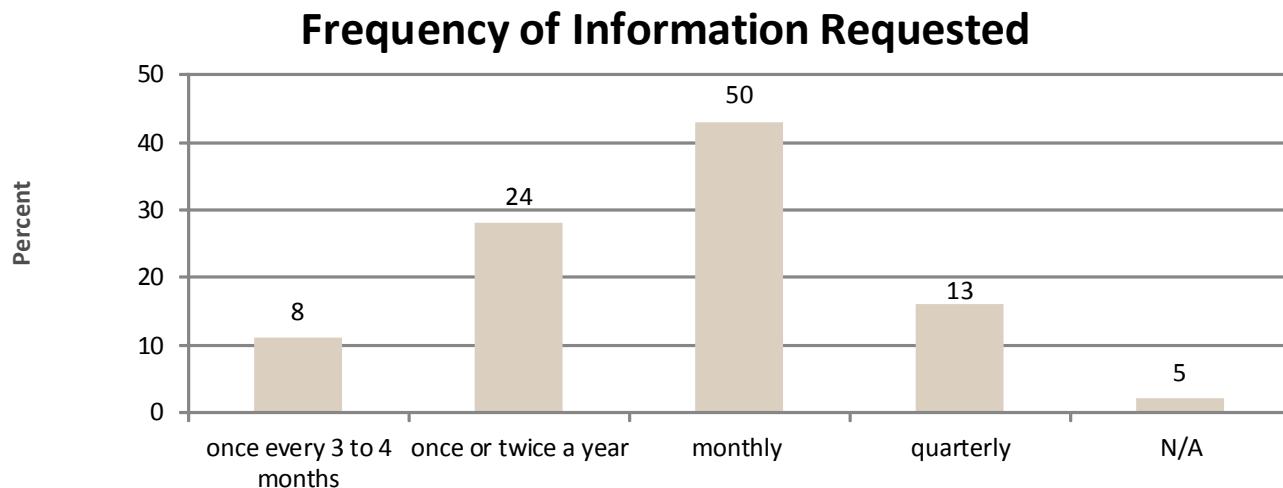

The age distribution is classified from less than 18 years old, to 65 years olds and over, in different age group categories. The largest group of users is in the 40-64 years old bracket, or 67.0 percent. This indicates that we have mature customers as the main users our labor market information products.

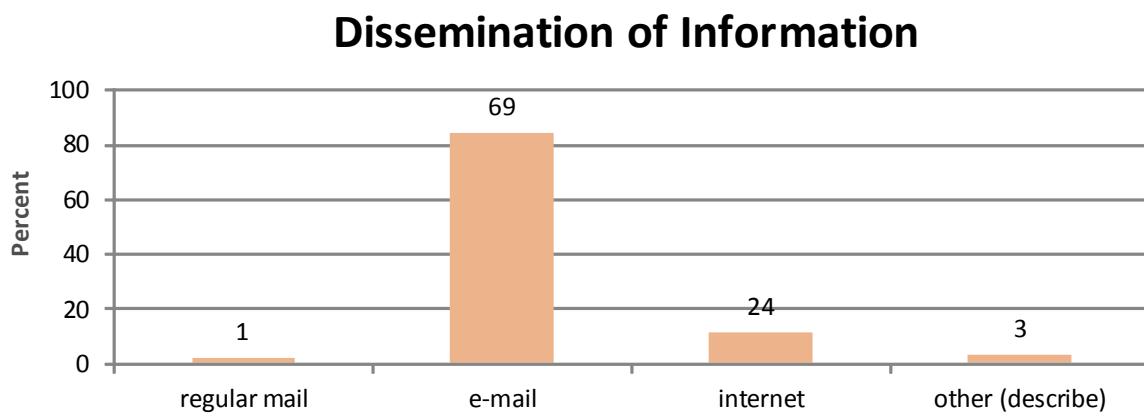

Age of Respondents

Fifty percent (50%) of our customers access our information on a monthly basis. According to our records, they are mainly Consultants, Counselors, College Professors and Students. The second group of approximately 24 percent uses the system once or twice a year. Quarterly frequency represents 13 percent of our users, and the remaining 8 percent access the system every three to four months.

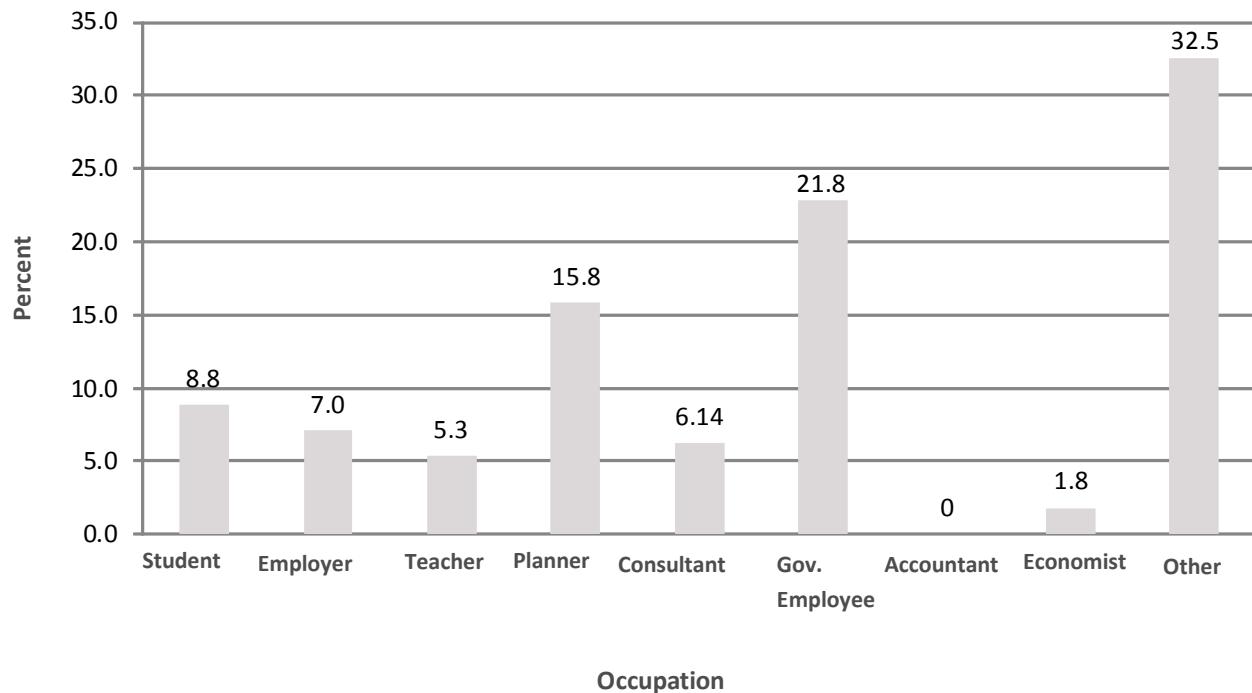

The most frequent method for the dissemination of information is by e-mails, used by 69 percent of the users, while 24 percent use the internet as a direct access of the information. Three percent did not answer the question.

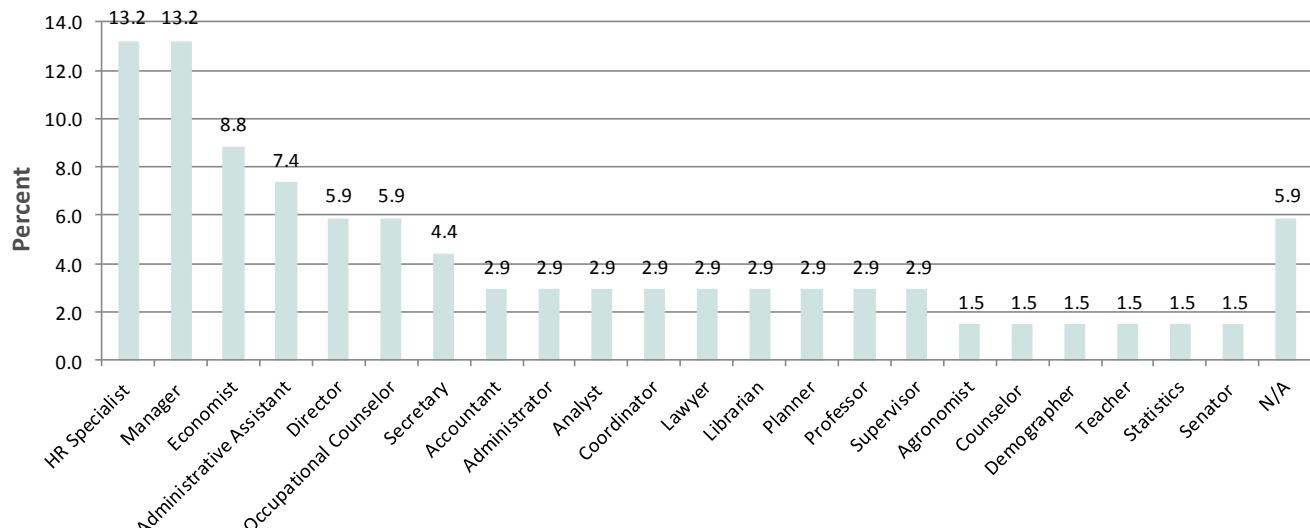

In terms of the occupations of those answering the survey, in general, 21.8 percent were government representatives who use the information mainly for grant application development, public policy determination, or other types of research. Labor Market Planners represent 15.8 percent of the users. Our respondents chose more than one alternative in questions 5, 6 and 7.

Occupation of Users 1/

Question number 6 inquires more precisely about the functions or tasks performed by the respondents in their current employment. From 78 regular information users, 68 answered to this question representing 87 percent of total possible answers. In terms of functions of the interviewees, the following were identified:

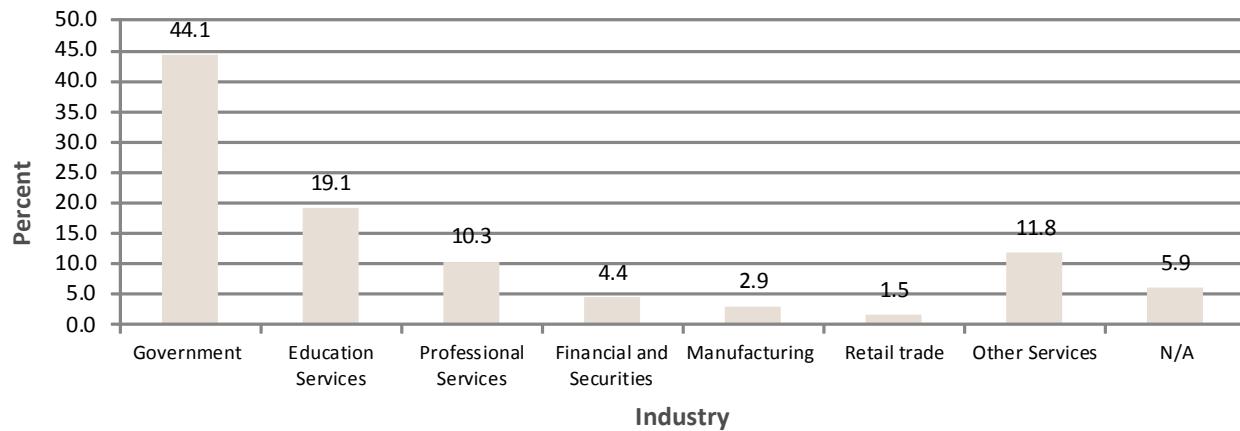

Tasks Performed by Respondents

Most of the respondent's functions were Human Resource Specialists and Managers with 13.2 percent each. The next one were Economists with 8.8 percent. This indicates that the top users of our information are those performing professional functions at their current occupation.

In terms of the industry, the interviewees identified their tasks with the following industries:

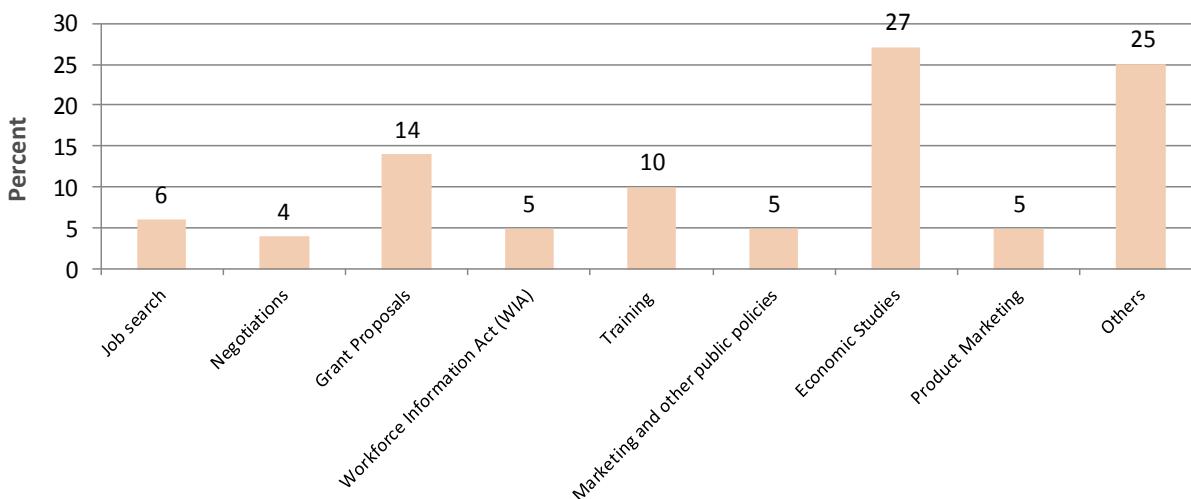

Industry of User

Government was the most identified industry within our respondents, representing 44.1 percent of the total. The Government industry was followed by that of Education Services with 19.1 percent and those in Professional Servicing with 10.3 percent.

The most common uses for the LMI information requested were for the performance of Economic Studies with 40.2 percent, and Grant Proposals with 15.4 percent. Again based on our records, these are mainly media reporters and consultants.

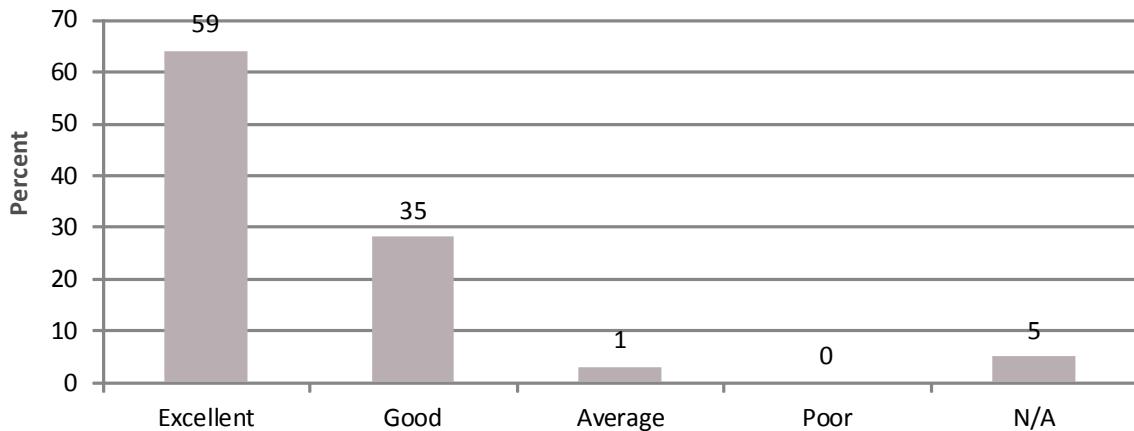

Purpose of the Information

Evaluation of Services

Upon asking about the evaluation of services provided by the Puerto Rico Bureau of Labor Statistics the results were very positive. The Excellent Category received 59 percent of the responses, and 34 percent rated our services as Good. This states that 94 percent of our users rated our services between Excellent and Good. Only one percent rated the services as Average.

Evaluation of Services

Recommendation and Comments

We have evaluated the suggestions and comments presented by the respondents in the survey. The following is a summary of their responses:

- Present the information about employment and salaries more user friendly, and explain how they are used to calculate Puerto Rico's minimum wage and salaries.
- Need more statistical data by region and geographic area.
- Present your statistics more similar to the way that the U.S Census does.
- Disseminate the Industries into 4 or 5 NAICS digits.
- Update your publications.
- Present statistics regarding uncommon occupations and specialized business services.
